Westlund Engineering's reciprocating placer.
Guards removed for clarity

Westlund Engineering Model 200 reciprocating placer is designed for compactness and dependability. The smaller size adds to its versatility, allowing it to adapt to most conveyors. Adjustable height, along with horizontal or vertical positioning, provides the flexibility for a variety of projects.

Our placer is available with single or multiple lanes. Magazines can be adjusted to accept most standard sized products. Our placer operates at up to 90 placements per minute. Literature, coupons, trays, boards, pouches, plates and packets are all easily handled.

A fully electrical operation means durability that can be relied on job after job. Electronic sensing allows for synchronization to your machines and conveyors

Westlund Engineering can also provide you with the machinery solutions to your collating and product handling needs. At your request, Westlund Engineering will analyze your application and recommend the proper equipment.

At your request, a company representative will analyze your application and recommend the proper equipment
