\*Guards removed for clarity

Westlund Engineering Model 350 Rotary Placer is designed for dependability and versatility.

The placer is available with single or multiple magazines to accept most standard size products with speeds up to 800 placements per-minute. It will handle literature, coupons, labels, trays, boards, pouches, etc.

The machine can be equipped with electronic drives and sensing to synchronize with your machine. It can also be driven directly from your drive with belt or shaft.

Westlund Engineering can provide you with the machinery solutions for your collating and product handling systems.

At your request, a company representative will analyze your application and recommend the proper equipment
